**PART 1
INTENT
STATEMENT OF GENERAL POLICY
HEALTH AND SAFETY POLICY STATEMENT**

1. St. Cuthbert's Roman Catholic Academy Trust recognises its health and safety duties under the Health and Safety at Work Act 1974, the Management of Health & Safety at Work Regulations 1999 and accompanying protective legislation, and the CEO Ged Fitzpatrick recognises that he has a responsibility to ensure that all reasonable precautions are taken to provide and maintain working conditions which are safe, healthy and comply with all statutory requirements and codes of practice.
2. The Trust, so far as is reasonably practicable, proposes to pay particular attention to:
 - a) The provision and maintenance of a safe place of work, a safe system of work, safe appliances for work, and a safe and healthy working environment
 - b) The provision of such information and instruction as may be necessary to ensure the health and safety of its employees and others, and the promotion of awareness and understanding of health and safety throughout the workforce.
 - c) Ensuring the safety and absence of health risks in connection with use, handling, storage and transport of all articles, substances and equipment
 - d) Making regular assessments of risks to employees
 - e) Taking appropriate preventative/protective measures as identified by risk assessment.
 - f) Appointing Stallard Kane Associates Ltd to secure compliance with statutory duties.
3. In order that the Trust can achieve those objectives, it is important that employees recognise their duty, whilst at work, to take reasonable care for the health and safety of themselves and of other persons. Employees should also co-operate fully with the Trust or anyone else concerned, to ensure that their obligations are performed or complied with.
4. The Trust will ensure adequate resources both in terms of time and money are made available to the necessary people to ensure that the items listed above are implemented and all employees are provided with the necessary instruction, information, training and supervision to enable them to carry out their work without risk to themselves or others. An annual review of the Health and Safety Policy will also be undertaken to ensure it is relevant to the work being undertaken by the Trust and all legislation quoted is up to date, where necessary the policy will be developed and expanded.
5. The Trust is also committed to the continuous development and improvement of the Trust's health and safety management system. The Trust will ensure that the health, safety & welfare of any employee or subcontractor is not compromised for financial or commercial gain.
6. All employees of the Trust agree, as a term of their contract of employment, to comply with their individual duties under the Health and Safety at Work Act 1974, and the Management of Health and Safety Regulations 1999 and other legislation, and to generally co-operate with the Trust so as to enable it to carry out its duties towards them. The attention of all employees is drawn to the attached safety rules and procedures, and employees should recognise that failure to comply with their health and safety duties and obligations can lead to dismissal from employment. In the case of serious breaches, such dismissal may be instant without prior warning.
7. This policy has been prepared in furtherance of section 2(3) of the Health and Safety at Work Act 1974 and binds all staff. We request that our customers and visitors respect this policy, a copy of which can be obtained on demand.

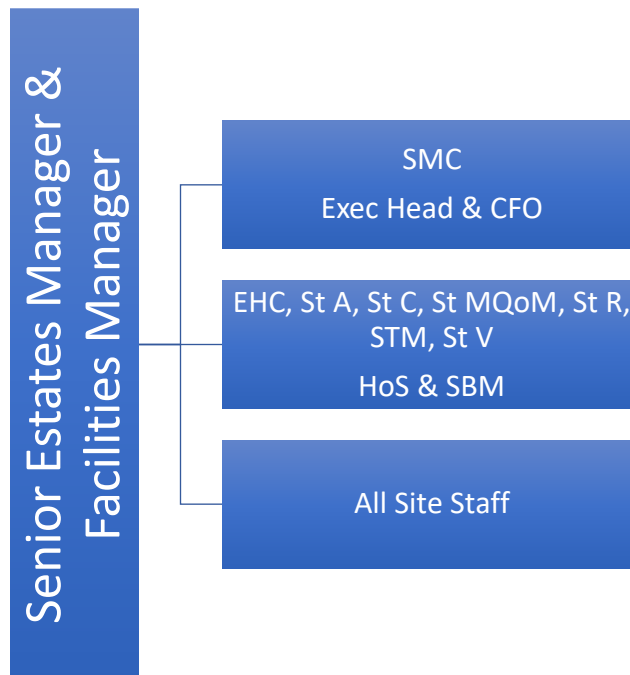

Signed:

Mr Ged Fitzpatrick
CEO Responsible for Health and Safety
September 2018

Peter Fearnley
Chair of Trust
September 2018

PART 2

**ORGANISATION
TRUST ORGANISATION FOR SAFETY & HEALTH**

Competent person for Health and Safety (Reg. 7 of MHSW Regulations 1999 refers) is Stallard Kane Associates Ltd located at:

Head Office Address: 9 Lord Street
Gainsborough
Lincolnshire
DN21 2DD

Telephone No.: 01427 678660

ORGANISATION AND RESPONSIBILITIES

The Trust has responsibilities under Health and Safety legislation towards:

- Employees
- Customers, Visitors and the Local Community
- Members of the Public
- Contractors/Sub Contractors

The Organisation is run by the Academy Trust Board who are supported by the Chief Executive Officer, Chief Operating Officers and Headteachers, who are ultimately responsible for all health and safety matters. These persons will have received all necessary training with respect to health and safety. In the majority of cases, however, the Chief Executive Officer will assume responsibility. In addition, the organisation has appointed Stallard Kane Associates as the competent person for health and safety supported by the Trust Senior Estates Manager as the nominated person for health and safety.

RESPONSIBILITIES FOR HEALTH AND SAFETY The Academy Trust Board

The Academy Trust Board are responsible for ensuring that the policy enables the Trust to fulfil its legal duties and emphasises the determination to manage its activities so that standards of Health and Safety are continuously improved. The Board will monitor conditions and Health and Safety performance to determine whether the policy is adequately resourced, effective and is being developed to meet changing requirements.

It will be their responsibility to ensure that:

- Systems are in place to review and up-date this Policy annually, when major staffing changes occur, or when new equipment is introduced
- Health and Safety objectives for the Trust are set and monitored
- Sufficient arrangements, facilities and finances are available for fully implementing this Policy
- Safe systems of work are in operation, and staff receive adequate and appropriate training
- Appropriate financial requirements for the Trust's Health & Safety function is contained within the legal resources
- Adequate resources are made available to allow the effective implementation of the Trust's Health and Safety policy

CEO RESPONSIBLE FOR HEALTH AND SAFETY

The CEO who has overall responsibility for Health & Safety is responsible for ensuring that the Policy enables the Trust to fulfil its legal duties and emphasises the determination to manage its activities so that standards of Health and Safety are continuously improved. The CEO will monitor conditions and the Health and Safety performance to determine whether the policy is adequately resourced, effective and is being developed to meet changing requirements.

The CEO responsible for health and safety is responsible for ensuring that:

- The Policy is continually monitored, and necessary changes are implemented.
- Safe systems of work are in operation, and staff receive adequate and appropriate training
- All personnel are aware of, and instructed in, their individual legal responsibilities, and that these are properly discharged
- All work carried out, and all plant, machinery and equipment comply with the Health and Safety at Work Act 1974, the Management of Health and Safety at Work Regulations 1999, the Construction Design and Management Regulations 2015 and the Provision and Use of Work Equipment Regulations 1998
- Any statutory inspections necessary are carried out as required and records kept.
- Information on Safety, Health and Welfare matters is effectively communicated to all employees
- All staff are conversant with the Trust and Health and Safety Executive accident reporting procedure (RIDDOR)
- Adequate First-Aid facilities are available in accordance with current Regulations, and suitable persons are trained in first aid to the required standard
- Periodic Statutory Tests, Inspections and Maintenance of premises and equipment are carried out and records are properly maintained
- Fire Precautions and Portable Appliances are in place and are Tested, Maintained, and kept up to date with the latest legislative requirements
- All staff are acquainted with the Emergency Evacuation Procedures and Emergency Plan
- Suitable Personal Protective Equipment (PPE) is available, issued and in use
- Staff are competent to carry out their work safely, and have received adequate information, instruction and training
- A personal example is set by promoting a positive health and safety culture
- All potential hazards, or reported hazards, are examined and evaluated and then eliminated or adequately controlled
- The following statutory notices are displayed:
 - ◆ A signed copy of the Health and Safety Policy Statement of Intent
 - ◆ Employers liability insurance certificate
 - ◆ Health and Safety Law poster
 - ◆ First Aid (notifying the names and locations of the First- Aiders)
 - ◆ Fire exit signs (with directional signs and running person)
- The following documentation is held:
 - ◆ Accident incident reports and records

- ◆ Sickness and absence records
 - ◆ Educational visit records
 - ◆ Risk assessment
 - ◆ Building, plant and equipment health and safety information
- Health and Safety improvement suggestions received from staff are given due consideration

**NOMINATED PERSON FOR HEALTH & SAFETY
Senior Estates Manager**

Responsible for ensuring that:

- The legal implications of relevant legislation are raised with, and understood by the Academy Trust Board
- Health and Safety performance is monitored and reported to the Trust Board
- The Trust procedures are effectively communicated to all staff and visitors
- New hazards are identified and eliminated or reported
- Information received about potential hazards is acted upon
- A safe environment is created and supported
- The benefits of good health and safety practice are promoted
- Health & Safety training needs are assessed, and necessary training is provided
- Ensure accident and near-miss reporting procedures are understood and complied with and lead with accident investigations where appropriate.
- Liaison takes place with the Health and Safety Adviser, Environmental Health Officer, HSE or any other person or body with an interest in good health and safety practice

The above responsibilities will be implemented in association with Stallard Kane Associates Ltd, as the Trust's "Competent Person" for all Health and Safety matters, as defined by the Management of Health and Safety at Work Regulations 1999.

TRUST COMPETENT PERSON

As required by Regulation 7 of “The Management of Health and Safety at Work Regulations”, Stallard Kane Associates Limited have been appointed to advise and assist all related Health, Safety and Welfare issues related specifically to our business undertakings. Stallard Kane Associates Limited will be responsible directly to the CEO and will also maintain a close relationship with all other employees.

Specifically, they will perform the following functions:

- Advise on the application and maintenance of our Trust Health and Safety Policy arrangements
- Maintain an up-to-date knowledge in matters of legislation and Regulations as they apply and affect the Trust and its Health and Safety Policy
- Advise the CEO on any related Safety matters
- Monitor the Trust’s Health and Safety status by regular visits to site and ensuring our compliance with current legislation and our Trust policy and standards
- Maintain a close liaison with the Health and Safety Executive Inspectors and other appropriate organisations and departments relevant to our undertaking
- Advise the CEO on training requirements for employees ensuring they are competent to carry out detailed tasks within the parameters of current safety legislation
- Advice on interpretation of legal requirements
- Assistance with strategy for implementation of the policy
- Provide investigations of serious accidents
- Revise the policy in the light of experience or legal change
- Advice upon the visit of an Enforcement Officer

HEADTEACHERS, SENIOR LEADERS, MANAGERS AND SUPERVISORS

- All Headteachers, Senior Leaders, Managers and Supervisors are expected to demonstrate by example their total commitment to health and safety matters.
- Each Headteacher, Senior Leader, Manager and Supervisor is responsible for their personal safety and that of all personnel under their authority, including others who may be affected by the Trust's activities.

In particular they will:

- Understand and implement the Trust safety policy
- Ensure and encourage the highest possible standards of Health & Safety within their department by effective communication and consultation with employees
- Monitor standards of Health and Safety within their areas of concern
- Ensure good standards of housekeeping are maintained
- Ensure that suitable personal protective equipment is identified, provided, used, maintained, cleaned and stored appropriately
- Ensure staff health and safety training needs are assessed and staff attend appropriate health and safety training
- Carry out hazard spotting checks of their department / area of concern
- Appreciate the responsibilities of personnel under their authority and ensure that each employee knows his/her responsibility and are equipped to play their part.
- Conduct Risk Assessments on activities within their department, ensuring that the methods and systems of work are safe and ensure that the necessary procedures, rules and regulations designed to achieve this are formulated, published and applied.
- Provide written instructions of work methods outlining potential hazards and precautions, and ensure they are complied with.
- Ensure accident and near-miss reporting procedures are understood and complied with and assist with accident investigations where appropriate.
- Ensure all employees and sub-contractors are suitably trained/competent to carry out the prescribed task and that the necessary licenses/certificates of competence are in force and appropriate.
- Ensure the Statutory Notices, the Safety Policy, Insurance Certificate and the names of appointed First Aiders are displayed and maintained in prominent locations.
- Ensure that all new employees in the Trust are provided with a copy of the policy statement, receive such induction training as may be laid down in procedures, are issued with personal protective equipment as required and their personal responsibilities as set out in this manual.

- Reprimand any employee for failing to discharge their health and safety responsibilities.
- Set a personal example with regard to health and safety matters.

EMPLOYEES

The Management of Health and Safety at Work Regulations 1992 (M.H.S.W.R.) re-enacts the Health and Safety at Work etc. Act 1974, which places responsibilities on the employer and employees alike. In this connection, the Trust reminds employees of their duties under Section 7 of the act: to take care for their own health and safety and that of others who may be affected by their acts or omissions. Additionally, employees must also co-operate with the Trust to enable it to discharge its own responsibilities successfully. Furthermore, all employees are expected to:

- Not interfere with, or misuse, anything provided by the employer in the interest of Health, Safety and Welfare
- Arrange for any spillage of dangerous substance or flammable liquid to be dealt with immediately having due regard to the nature of such spillage
- Wear, use and store correctly all protective clothing and equipment issued to them and obtain replacements for lost, damaged or defective items
- Carry out assigned tasks and duties in a safe manner, in accordance with instructions, and to comply with safety rules/procedures, regulations and codes of practice.
- If aware of any unsafe practice or condition, or if in any doubt about the safety of any situation, consult their supervisor or line manager.
- Obtain and use the correct tools/equipment for the work and not to use any that are unsafe or damaged.
- Ensure that all guards are securely fixed, and that all safety equipment and provided is used.
- Not operate any plant or equipment unless trained and authorised to do so.
- Report any accident, near-miss, dangerous occurrence or dangerous condition to their line management.
- Switch off and secure unattended plant or equipment.
- Avoid improvised arrangements and suggest safe ways of eliminating hazards.
- Not participate in horseplay or place fellow employees in danger by their actions.

PART 3

ARRANGEMENTS

1. Systems and Procedures

The Trust recognises the importance of Health, Safety and Welfare, and will adopt a systematic approach towards ensuring that a Healthy and safe environment is provided and maintained for all employees and other persons who could be affected by our work activities.

Equally important is the need for constant alertness by the CEO Responsible for Health and Safety and employees in identifying and eliminating potential hazards wherever possible.

It is our primary objective that in conducting our activities, account must be taken by all parties of the need to:

- Formulate and maintain safe working systems, including work carried out during maintenance
- Take all necessary steps to establish the causes of accidents and risks to health, which may occur, and to ensure that reasonable measures are taken to prevent recurrence
- Ensure that no process, chemical or equipment is introduced unless it complies (where required) with statutory testing or examination requirements; also, to ensure that, so far as is reasonably practicable, the Health and Safety of employees etc. will not be affected
- Provide proper and adequate induction and training to ensure that all employees are fully competent in safe working methods applicable to their work
- Encourage the closest possible liaison between the Trust and employees in matters relating to Health and Safety
- Ensure that all legal requirements relating to our activities are fully complied with, and progressively improve upon the levels of Health and Safety performance
- Consult with employees, and advise them of their legal duties and responsibilities, including the requirement to:
 - Abide by safe working systems
 - Make use of facilities and equipment provided for their protection
 - Refrain from any act which could endanger themselves or others
 - Refrain from intentionally or recklessly interfering with, or misusing anything provided in the interests of Health Safety and Welfare
 - Report any known defect, which could endanger the Health or Safety of themselves or others
 - Co-operate as far as is necessary to ensure that we meet our legal requirements

1.1 Consultation with employees

A requirement of the Health and Safety (Consultation with Employees) regulations is for us to consult with our employees in all matters relating to health and safety.

The Trust will convene regular meetings, to discuss all relevant issues relating to health and safety.

In particular, we will discuss the following:

- When introducing new measures which may affect health and safety
- The change in appointment of nominated competent persons
- The provision of statutory health and safety information
- Any statutory health and safety training
- Health and safety of implications of introducing new technology, equipment or work activities

The meetings will be formal, and minutes of the meeting will be documented and displayed on Trust health and safety notice boards.

2. Arrangements for Implementing Policy

2.1 Communication with Employees.

We will ensure all employees are briefed on the Trust health and safety policy and other relevant health and safety information, firstly during their new starter induction when joining the Trust and periodically as the policy is updated or legislation is introduced / removed or after any changes which may affect their health, safety and wellbeing. All employees will be provided with health and safety information on an annual basis as a minimum in the form of a health and safety booklet created by our external health and safety advisors. Employees will also be briefed by their supervisor in the form of toolbox talks as required by the management team or advised by our external health and safety consultants.

If an employee's first language is not English or where they have any other condition which may affect their ability to understand written or verbal communication the Trust will take the necessary steps to ensure the required information is effectively communicated. This communication may include the use of existing employees who speak the same language as the affected employee or employees or who can read the same language. Where necessary we will ensure written documentation is provided in a suitable language for employees to understand.

All employees are reminded that the Trust operates an open-door policy and all employees are free to contact any member of the management team regarding any health and safety concerns they may have or where they have ideas which may improve the health, safety and wellbeing of employees. All concerns or ideas raised will be given due consideration by the management team and feedback will be given to employees where appropriate.

2.2 Fire

Written Risk Assessment in accordance with the Regulatory Reform (Fire Safety) Order 2005 (FSO) will be undertaken and kept up to date. The control measures identified will be issued to relevant employees. Training and information will be provided as necessary.

Detailed procedures for evacuations including exit routes and information on good practice are held and will be made available for the information of all staff and visitors. Equipment checks, and evacuation drills will be held at regular intervals. Fire Wardens will be appointed, and another member of staff will act as an evacuation "Roll Caller".

Staff will be trained in fire Safety and the use of fire equipment. They will also be briefed on the role of individuals and the action to take in the event of a fire or other emergency.

2.3 Risk Assessment

All significant hazards will be identified, and the associated risks assessed. Significant risks will be recorded. Simple, effective control measures will be agreed, with the involvement of the employees affected. Safe systems of work will be produced and implemented in respect of all work activities where a significant risk has been identified.

Written assessments and safety procedures will be completed and recorded for all schools and communicated to all affected employees.

Specific Risk Assessments will include:

- Manual Handling/PPE/COSHH/Water Hygiene/Risk
- Fire
- Machinery & Equipment

2.4 First-Aid

The Health and Safety (First-Aid) Regulations 1981 will be complied with and a suitable number of persons will be nominated and trained and certificated to the necessary standard as per the findings of a first aid risk assessment to allow sufficient cover for all working hours and shift patterns.

Details of the First Aiders will be displayed prominently for the benefit of all employees and visitors and brought to the attention of all new employees at their induction stage.

Stock levels of items required under the Regulations will be checked at regular intervals and boxes will be kept secure, yet quickly available when required. Special arrangements will be made to provide cover where employees work away from Trust premises.

The CEO Responsible for Health and Safety will maintain a register of certificated First Aiders and will ensure that a minimum level of cover is provided at all times.

2.5 Accident Procedure

Details of all accidents will be recorded on reporting forms provided by Stallard Kane Associates Limited, and where appropriate investigated by Stallard Kane Associates Limited. Employees are required to assist with any investigation of accidents and/or dangerous occurrences that take place within their work area.

The requirements of RIDDOR will be followed in respect of any recordable/reportable accident or dangerous occurrence (see 2.6).

2.6 Statutory Notification of Accidents/Dangerous Occurrences

When a specified injury or dangerous occurrence has occurred, the HSE will be notified immediately and the online notification form will be completed and sent within 10 days of notification. Others to be notified as soon as possible are, Stallard Kane Associates Ltd, and the Trust's insurers.

Notifiable occupational diseases will be reported to the HSE via the online notification form.

Where a person is absent from work or unable to perform their normal working duties as a result of a work-related incident/accident over 7 consecutive days, the HSE Incident Control Centre must be notified within 15 working days from the day of the accident.

All over 3-day accidents will be recorded.

All reportable accidents or dangerous occurrences will be investigated, and a report issued. In their role as the Trust's Safety advisors Stallard Kane Associates Ltd will assist with the investigation and give advice and guidance.

Action considered necessary to prevent a recurrence will be taken, and a report submitted to the enforcing authority.

The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013

These regulations require certain accidents and dangerous occurrences at work to be notified to the Local Authority, and a guideline is set out on the following page:

Accidents Which Require Immediate Reporting to The Local H.S.E.

Work-related accidents

For the purposes of RIDDOR, an accident is a separate, identifiable, unintended incident that causes physical injury. This specifically includes acts of non-consensual violence to people at work.

Please note: Not all accidents need to be reported, a RIDDOR report is required only when:

- The accident is **work-related**
- It results in an injury of a type which is **reportable** (as listed under 'Types of reportable injuries')

When deciding if the accident that led to the death or injury is work-related, the key issues to consider are whether the accident was related to:

- The way the work was organised, carried out or supervised
- Any machinery, plant, substances or equipment used for work
- The condition of the site or premises where the accident happened

If none of these factors are relevant to the incident, it is likely that a report will not be required.

Types of reportable injury

Deaths

All deaths to workers and non-workers must be reported if they arise from a work-related accident, including an act of physical violence to a worker. Suicides are not reportable, as the death does not result from a work-related accident.

Specified injuries to workers

The list of 'specified injuries' in RIDDOR 2013 (regulation 4) includes:

- A fracture, other than to fingers, thumbs and toes
- Amputation of an arm, hand, finger, thumb, leg, foot or toe
- Permanent loss of sight or reduction of sight
- Crush injuries leading to internal organ damage
- Serious burns (covering more than 10% of the body, or damaging the eyes, respiratory system or other vital organs)
- Scalping (separation of skin from the head) which requires hospital treatment
- Unconsciousness caused by head injury or asphyxia
- Any other injury arising from working in an enclosed space, which leads to hypothermia, heat-induced illness or requires resuscitation or admittance to hospital for more than 24 hours

Over-seven-day injuries to workers

This is where an **employee, or self-employed person, is away from work or unable to perform their normal work duties for more than seven consecutive days** (not counting the day of the accident).

Injuries to non-workers

Work-related accidents involving members of the public or people who are not at work must be reported if a person is injured and is taken from the scene of the accident to hospital for treatment to that injury.

There is no requirement to establish what hospital treatment was provided, and no need to report incidents where people are taken to hospital purely as a precaution when no injury is apparent.

If the accident occurred at a hospital, the report only needs to be made if the injury is a 'specified injury' (see above).

Reportable dangerous occurrences

Dangerous occurrences are certain, specified near-miss events (incidents with the potential to cause harm.) Not all such events require reporting. There are 27 categories of dangerous occurrences that are relevant to most workplaces.

For example:

- The collapse, overturning or failure of load-bearing parts of lifts and lifting equipment
- Plant or equipment coming into contact with overhead power lines
- Explosions or fires causing work to be stopped for more than 24 hours

Certain additional categories of dangerous occurrences apply to mines, quarries, offshore workplaces and certain transport systems (railways etc). For a full, detailed list, refer to the online guidance at: www.hse.gov.uk/riddor.

Reportable occupational diseases

Employers and self-employed people must report diagnoses of certain occupational diseases, where these are likely to have been caused or made worse by their work. These diseases include (regulations 8 and 9):

- Carpal tunnel syndrome
- Severe cramp of the hand or forearm
- Occupational dermatitis
- Hand-arm vibration syndrome
- Occupational asthma
- Tendonitis or tenosynovitis of the hand or forearm
- Any occupational cancer
- Any disease attributed to an occupational exposure to a biological agent

Exemptions

In general, reports are not required (regulation 14) for deaths and injuries that result from:

- Medical or dental treatment, or an examination carried out by, or under the supervision of, a doctor or registered dentist
- The duties carried out by a member of the armed forces while on duty
- Road traffic accidents, unless the accident involved the loading or unloading of a vehicle
- Work alongside the road, e.g. construction or maintenance work
- The escape of a substance being conveyed by the vehicle; or a train

Recording requirements

Records of incidents covered by RIDDOR are also important. They ensure that we (the Trust) have collected sufficient information to allow us to properly manage health and safety risks. This information is a valuable management tool that can be used as an aid to risk assessment, helping to develop solutions to potential risks. In this way, records also help to prevent injuries and ill health, and control costs from accidental loss.

Records of the following will be maintained:

- Any **accident, occupational disease or dangerous occurrence** which requires reporting under RIDDOR
- Any other occupational accident causing injuries that result in a worker being away from work or **incapacitated for more than three consecutive days** (not counting the day of the accident but including any weekends or other rest days). We do not have to report over-three-day injuries to the HSE, unless the incapacitation period goes on to exceed seven days. Entries in to the Trust accident book will be a sufficient means of recording all over three-day injuries

When requested we produce RIDDOR & accident records when asked by HSE, local authority or any other statutory inspectors.

2.7 Equipment and Maintenance

All new and existing equipment and facilities will be sufficiently designed, constructed and installed so as to be safe and without risk to the Health and Safety of employees.

An adequately planned maintenance system will be operated, and records maintained.

Safe systems of work will be used and updated, such that protection against foreseeable maintenance hazards is provided.

All legally required maintenance, testing and inspections will be carried out and records kept in accordance with statutory provisions, insurer and fire authorities approved codes.

Only qualified electricians are permitted to carry out work on electrical wiring and apparatus, using safe systems of work.

2.8 Personal Protective Equipment (PPE)

Responsibilities: The CEO will be responsible for ensuring that only PPE to the correct standards has been issued and used.

The appropriate line manager will ensure that all persons under their control are equipped with, and use correctly, any PPE provided to them. They will also ensure that Risk Assessments relating to their work are reviewed to enable them to identify what safety precautions (including PPE) should be in place.

PPE Assessment: In accordance with the Personal Protective Equipment Regulations 1992, an assessment of the PPE requirements of each employee will be made using the PPE issue record form. For the purposes of co-ordinating Safety Management, the PPE Assessment will be included in the Trust's general assessment procedure detailed below.

It should be noted at this point that PPE would be used only as a last resort measure.

Where a hazard to an employee is identified, and the exact Risk level is not known, then that employee will be given the maximum possible protection until an adequate Risk Assessment has been carried out.

PPE Correct Standards: All personal protective equipment purchased by the Trust will be used to the correct BS or EN standard, equipment which is not CE marked will not be used.

The Managing CEO in liaison with the Trust Safety Advisers will ensure that the correct standard equipment is being purchased, issued and signed for on the appropriate form.

Issue of PPE: Employees will be issued with all necessary PPE relating to the hazards from their work activity or as a result of the findings of any Risk Assessment which relates to their work environment. Where an employee makes a reasonable request for additional equipment, this will be reviewed by their supervisor and where appropriate the equipment will be supplied.

Replacement of Equipment: All PPE will be replaced on a new for old basis. Re-issue or replacement of worn out PPE will be requested using the record form, which will be held in the office, in order that usage can be monitored.

Any PPE which is so worn or damaged that it no longer affords adequate protection must be replaced before the operative is allowed to continue work.

PPE which has a shelf life or maximum usage period will be replaced in accordance with manufacturer's instructions.

Training – Correct Use: Employees who are required to use PPE to ensure their safety will be given training in its correct use. All training will be provided in accordance with the manufacturers' guidance.

Personal Preference: Whilst every reasonable effort will be made to ensure that PPE satisfies requirements, the Trust cannot guarantee to satisfy individual's preference. Once issued PPE must be worn. It will not be left to the operative's discretion.

Damage / Misuse: It will be the responsibility of the employee to report any faulty or damaged Safety equipment to their CEO. It must then be exchanged as soon as possible.

Employees must not alter, deface or otherwise misuse any safety equipment supplied to them.

Maintenance: It will be the responsibility of each employee to ensure that PPE is maintained in good order. In order that operatives can be correctly equipped with safety equipment at short notice, a reserve stock will be held.

2.9 Electricity

Electrical equipment will be properly maintained to ensure that it is safe for normal use. All portable appliances will be examined prior to first use, then examined, and tested regularly thereafter. A register of appliances will be produced and kept up to date. The findings of inspections and tests will be recorded. Only qualified electricians are permitted to carry out work on electrical wiring and apparatus using safe systems of working.

Where practicable, equipment will be switched off when not in use, or on leaving the premises. All cabling, plugs and connections will be properly organised, inspected, recorded and maintained to minimise any risks, in accordance with the Electricity at Work Regulations 1989.

Employees will not carry out maintenance on electrical equipment or plugs without prior authority and training. Employee's personal electrical apparatus is not to be used on Trust premises without prior permission.

The mains electricity supply will be inspected, and a certificate of test obtained from a "Competent Person" in accordance with the timescale laid down in the Regulations.

2.10 Premises and Welfare

Environment, Welfare and other related facilities will be maintained to the standard required by the Health and Safety at Work etc. Act 1974 and the Workplace (Health, Safety and Welfare) Regulations 1999. Particular attention will be given to the general fabric, temperature, ventilation, purity of air and water supplies, lighting, sanitary conveniences and noise.

Where Trust employees are required to undertake work off site the CEO Responsible for Health & Safety will ensure at the planning stage that the requirements for welfare provision are suitably assessed and provisions made before work commences on site.

2.11 Control of Substances Hazardous to Health (COSHH)

The requirements of the COSHH Regulations 2004 and other related legislation will be satisfied. All necessary precautions will be taken in the use, storage and transportation of any material or substance. The least hazardous type of any substance will be used or purchased in order to minimise any associated risk. There will be regular assessments and monitoring to ensure that this is achieved.

No new substances will be introduced into the workplace until the information regarding possible hazards and the necessary precautions to be observed have been fully evaluated by a competent person.

Responsibilities: The CEO will be responsible for ensuring that this section is implemented and that all employees are given adequate information about any substances which are to be used.

CEO must ensure that the significant findings of any COSHH Assessment, including the safety precautions to be adopted, are communicated to all operatives who will be exposed to the substances.

Employees will not use any substances unless a COSHH assessment has been carried out and its findings communicated to them. If an employee has not received a COSHH assessment or the relevant training, then they are to cease use immediately and contact a CEO.

Hazardous Substances Register: The CEO will create and maintain a Hazardous Substance Register. The register will contain Hazard Safety Data Sheets for every substance purchased by the Trust. These data sheets will be supplied by the supplier of the substance and must be formatted so as to provide clear Health and Safety information, including first aid, fire precautions, emergency action, correct storage and safe handling.

COSHH Assessment: A COSHH Assessment will be carried out for every substance, or where practicable on substance groups i.e. solvent based paints grouped onto one assessment.

All COSHH Assessments will be carried out on the standard form. The format of the assessment is such that it takes the following factors into account:

- Type of Substance
- Work Location/Environment
- Work Duration

All assessments will be in writing and will be held available for inspection at all times at an appropriate point in the workplace. A central file will be created which will contain master copies of all assessments carried out.

COSHH Assessments will be reviewed at the following times:

- If the work environment changes
- If it is requested by the operative
- In any case every 12 months

Any review must be recorded on the assessment with a review date and the name of the person who carried out the review.

Substance Substitution: Wherever possible hazardous substances will be replaced with less hazardous ones. It will be the responsibility of the Managing CEO to investigate the availability of replacement substances and put them to use as soon as possible. Substances must also be assessed as necessary. Advice from Stallard Kane Associates Ltd shall be sought where applicable.

Safety Precaution Advice: Any safety precautions recommended as a consequence of a COSHH Assessment must be adhered to at all times while the substance is in use.

Health Surveillance: All hazardous substances will be stored in correct storage facilities away from the work area. Storage facilities will be kept locked at all times and will be constructed as such that they do not pose a risk to the substance and will not allow any spillage to leak out.

Safety notices will be posted on all storage facilities warning of the dangers associated with the substances being stored together.

The Hazard Safety Data Sheets for all substances being stored will be available at the storage facility.

Only the minimum quantity required for immediate work will be removed from the storage facility. Persons required to handle hazardous substances will be given training in both correct handling techniques and safety precautions for hazardous substances.

All spillages will be soaked up using sand or chemical dry granules, contaminated materials are then to be disposed of in accordance with local authority rules. Hazardous substances are not allowed to enter any drain or watercourse.

The CEO is to be informed of any substantial spill immediately.

Information and Training: All employees who may be exposed to any Hazardous Substances will be informed of the existence of the Hazardous Substances Register and COSHH Assessment files at their Safety Induction.

They will be instructed to use these documents as reference to ensure that safety precautions are adhered to.

2.12 Contractors/Sub-Contractors

It is the responsibility of the Contractor/Sub-Contractor to ensure that their employees adhere to, and co-operate with, legislative and Trust rules in regard to Health and Safety whilst working for the Trust.

It is also the responsibility of the Contractors/Sub-contractors to ensure that the Health, Safety and Welfare of the Trust's staff, visitors and others is not put at risk from their work activities and practices, and that safe systems of work are adhered to at all times.

Where contractors are to carry out work on site, they will be asked to provide evidence of Health and Safety competence in advance. Copies of Risk Assessments, Construction Phase Programmes, COSHH Assessments, Method Statements, or similar documentation, must be submitted and approved by the Trust's person responsible, as confirmation that Risks to Health and Safety are being properly managed. All contractors will report to the prearranged designated person prior to commencing work.

The activities of contractors whilst they are on site will be monitored to ensure that their methods of work are safe, and do not put the safety of the Trust's employees at risk.

2.13 Drugs and Alcohol

In industry generally, there has been a move to greater controls and in keeping with this the Trust has adopted a policy in relation to the consumption of alcohol and drugs.

The Trust's policy on alcohol is intended to be a positive approach towards maintenance of the highest standards of safety in the workplace. It is also intended to benefit the Health & Safety of each individual.

Any employee who feels that they may have a problem relating to drugs or alcohol should immediately seek help from the CEO Responsible for Health and Safety via their line manager. This information will be treated in the strictest confidence. The Trust will endeavour to offer any assistance available at the time.

Likewise, any employee taking prescription medication that may affect their ability to undertake their normal scope of work safely must inform the CEO responsible for Health & Safety via their immediate supervisor so that alternative work will can be allocated where necessary.

Employees must not attend work whilst under the influence of alcohol or non-prescription drugs.

Employees must not consume alcohol or non-prescription drugs on the premises.

Employees must not return to work after breaks under the influence of alcohol or non-prescription drugs.

BREACH OF THIS DRUGS AND ALCOHOL POLICY IS A DISMISSABLE OFFENCE.

2.14 Smoke-free Policy

Purpose

This policy has been developed to protect all Employees, Contractors, Customers and Visitors from exposure to second-hand smoke and to assist compliance with the Smoke-Free (Premises and Enforcement) Regulations (England) 2006.

Exposure to second-hand smoke, also known as passive smoking, increases the risk of lung cancer, heart disease and other illnesses. Ventilation or separating smokers and non-smokers within the same airspace does not completely stop potentially dangerous exposure.

Policy

It is the policy of the Trust that all our workplaces including vehicles are completely Smoke Free and all employees have a right to work in a Smoke Free Environment. This policy shall be reviewed on an annual basis.

Smoking including the use of electronic cigarettes is prohibited throughout the entire workplace including vehicles with no exceptions. This policy applies to all Employees, Consultants, Contractors, Customers and Visitors.

Implementation

Overall responsibility for policy implementation and review rests with the Managing CEO of the Trust. All employees are obliged to adhere to and facilitate the implementation of the policy.

The Managing CEO shall inform all existing Employees, Consultants and Contractors of the policy and their role in the implementation and monitoring of the policy. The Managing CEO or the person delegated to must inform during induction all new personnel of the No Smoking Policy. Appropriate 'No smoking' signs will be clearly displayed at the entrances to and within Trust premises.

Non-compliance

Local disciplinary procedures should be followed if a member of staff does not comply with this policy. Those who do not comply with the Smoke-Free (Premises and Enforcement) Regulations (England) 2006 are also liable to a fixed penalty fine and possible criminal prosecution.

2.15 Working at Height

The Trust recognises and accepts its responsibility under the Work at Height Regulations 2005 and shall as far as reasonably practicable ensure:

- All work at height is avoided where possible
- All work at height is properly planned and organised
- All work at height takes account of weather conditions that could endanger health and safety
- Those involved in work at height are trained and competent
- The place where work at height is done is safe
- Equipment for work at height is appropriately inspected

- The risks from fragile surfaces are properly controlled
- The risks from falling objects are properly controlled
- Take account of the risk assessment carried out under regulation 3 of the Management of Health and Safety at Work Regulations 1999
- Suitable rescue procedures are in place for all working at height activities, employees are trained to use rescue equipment and rescue procedures

See the Trust Full Work at Height Policy for more information on the Trust's safe working procedures for work at height activities.

2.16 Workplace Noise Control/Vibration Control

Responsibilities: The CEO Responsible for Health and Safety will ensure that this procedure is implemented and complied with in all areas of work where a noise or vibration hazard is identified.

The CEO must ensure that the persons under their control are aware of the requirements of this procedure and that they are complied with at all times. They will also ensure that the correct protective equipment is provided as required.

All employees will be required to co-operate with the Trust in its attempts to reduce or control noise or vibration exposure.

Noise Surveys: In accordance with the Control of Noise at Work Regulations 2005, the Trust will take all reasonable steps to identify work place noise levels. The list, once created, will form part of this procedure.

Noise surveys will be carried out by competent persons using correct equipment and will be recorded in writing. Tool manufacturers will be consulted to establish individual noise levels.

Noise surveys will be reviewed at the following times:

- If work patterns change significantly
- If machinery is moved or if new machinery is installed
- At any other time, it is believed that the survey is no longer valid

Where the exact noise level created on site or by an individual tool cannot be established, the maximum possible protection will be provided until the matter is resolved.

Risk Assessment: Wherever possible noise assessment for site activities will be included in the risk assessment procedure. Information supplied by manufacturers will be used to determine whether a tool used in a work activity is creating a noise hazard. Site environment noise levels will also form part of the assessment.

Noise Action Levels: The Control of Noise at Work Regulations have established noise action levels above which hearing will be damaged. These are based on dosage averaged over a working day.

The action levels are expressed as dB(A):

- First Action Level - 80 dB(A)
- Second Action Level - 85dB(A)

Where the Trust operates a permanent workshop, the following actions will apply:

If the First Action Level (80 dB(A)) is reached or exceeded:

The CEO will:

- Reduce the risk of damage to hearing to the lowest possible by other means than issuing PPE
- Inform all persons who may be exposed, of the risk to their hearing and of the availability of hearing protection
- Provide hearing protection at the employee's request

If the Second Action Level (85dB(A)) is reached or exceeded:

The CEO will:

- Reduce the exposure to noise to the lowest level possible other than issuing PPE
- Identify all areas where the Second Action Level is reached and post notices at all entrance points to those areas. The notices must warn of the hazards and state that the wearing of hearing protection is mandatory
- Post notices on all machinery which creates noise at or above the second action level
- Issue correct hearing protection to all persons who may be exposed WHICH MUST BE WORN
- Issue hearing protection to all persons in less noisy areas at their request
- Implement occupational health surveillance for employees exposed to noise levels above 85dB(A)

All site equipment having a noise level at or above the First Action Level will have a warning notice affixed stating that hearing protection is mandatory when the tool is being operated. This rule will apply to all persons who are within 12 metres of the tool.

Where, as a result of a risk assessment the general site is deemed to be a noise hazard, the CEO will ensure that all persons who enter or remain on site wear hearing protection at all times.

Vibration: Certain types of work equipment when in use can cause Vibration White Finger (VWF). CEO shall reduce exposure by use of anti-vibration equipment or rotation of personnel with regular surveillance. Tooling will be selected that has the lowest level of vibration possible and worn or damaged tooling will be replaced as soon as possible to prevent exposure to potentially hazardous levels of vibration.

Personal Protective Equipment: Where PPE is identified as a result of any noise or vibration survey or risk assessment it will be issued as soon as possible. Without prejudice any hearing protection provided must reduce the amount of noise reaching the ear to an acceptable level, this may need specialist advice.

Training: All employees will receive general noise and vibration awareness training as part of the Trust's safety programme, however where hearing protection is issued, specific training in its correct use, storage and maintenance will be given.

2.17 Stress

The Trust is committed to protecting the health, safety and welfare of its staff and recognises that workplace stress is a health & safety issue. The importance of identifying and reducing workplace stressors is also acknowledged.

This includes:

- Improving the organisational environment through effective and consistent management
- Enabling individuals to cope successfully with their work
- Providing support to employees whose health and well-being are affected by stress
- Manage and control factors which might result in excessive or sustained levels of stress
- Increase awareness of stress and its causes and methods to combat it
- Assist staff in managing stress in themselves and others

As far as reasonably practicable the Trust will:

- Provide managers with advice and support to help identify specific causes of stress
- Develop programmes for those with people management responsibilities to promote good management and team building skills
- Provide support through the Employee Assistance Programme
- Provide suitable training such as time management, assertiveness and dealing with difficult/sensitive situations
- Monitor the occurrence and levels of absence associated with stress

2.18 Asbestos

In the event of asbestos being found or is suspected, work will immediately stop in that area and the matter should be reported immediately to the Trust Nominated Person for Health and Safety. Under normal circumstances the suspected asbestos should not be touched. Wet it to contain any airborne fibres wherever possible and keep persons away from it. A specialist should be approached who will determine the next course of action which should, in the first place, to take a sample for analysis. The outcome of this analysis will determine the next course of action.

In compliance with the Control of Asbestos at Work Regulations 2012, and subsequent legislation, adequate information, instruction and training is given to employees to enable them to be aware of the health hazards of asbestos; how controls, protective equipment and work methods can reduce these hazards; and the correct use of maintenance of control measures.

Prior to commencing work on projects that may contain asbestos containing materials (ACMs) the following methods of assessment will be deployed:

- A risk assessment shall be carried out on the task and area of works in the first instance, and dependant on the findings of the risk assessment
- Where insufficient information is available to undertake works safely, an R & D (Refurbishment & Demolition) Survey shall be undertaken by competent persons
- A subsequent asbestos management plan shall be developed and implemented for the management of any remaining asbestos or ACMs. The plan will be reviewed on an annual basis as a minimum or as advised by the asbestos surveyor

Any asbestos survey undertaken will be in accordance with HSG 264: Asbestos the Survey Guide and also incorporate the advice and guidance within the Control of Asbestos Regulations 2012. Approved Code of Practice and guidance, obtaining client knowledge and registers of ACMs located in the premises.

2.19 Display Screen Equipment

In accordance with the Health and Safety (Display Screen Equipment) Regulations 1992, the following procedures will be followed:

"Users" of display screen equipment shall be individually identified by the responsible line manager. The manager shall ensure that all "users" have received sufficient instruction to allow them to operate the equipment provided, including the adjustment of screens, keyboards, chairs, foot rests, blinds, etc. Particular attention should be given to minimising reflection and glare.

"Users" shall be entitled to request an appropriate eye and eyesight test. Where "special" corrective appliances are needed; a special pair of spectacles for display screen work may be prescribed. Any cost arising from these tests and appliances will be borne by the Trust

2.20 Safety Training

Basic Training Considerations

The Trust recognises that safety training is an integral and important part of its overall safety policy and it will be given as a normal constituent of vocational training. No person will be employed on work involving any reasonably foreseeable significant risk unless he has received adequate training to help him understand the hazards involved and the precautions to be taken.

We will undertake an annual training needs analysis for all our employees as a minimum to ensure all employees have the necessary training and level of competence for the scope of works they undertake. The Trust Board is committed to providing sufficient funds and resources to ensure all necessary training is provided to employees.

Managerial Training

The Trust Board recognise, as fundamental to the success of the Trust safety policy, that management should have received the training necessary to control effectively the areas for which they are responsible.

Safety Advisor Training

It is essential that the Competent Person and Nominated Person's training needs are regularly appraised. They will be encouraged to seek such professional qualifications as befits the Trust's needs.

2.21 Health Surveillance

Responsibility: The CEO Responsible for Health and Safety shall ensure that health surveillance is provided where necessary for all employees and records maintained in line with data protection and health and safety legislation. Where necessary reasonable adjustments will be made for employees with any existing health conditions that may be aggravated or made worse by any work activities undertaken by the Trust. In order to

monitor the health of all employees an annual medical questionnaire will be issued and reviewed, and action taken in the event that an employee or employees have recorded any health issue or an increase / worsening of an existing condition due to the work environment.

Procedure: Where known occupational health risks exist within the company's scope of works a suitable and sufficient risk assessment and safe system of work will be developed for the work activity and control measures implemented to ensure the health, safety and welfare of all employees affected. Where health surveillance is required this will be outlined in the risk assessment and safe system of work and communicated to affected employees.

CEO shall, where work activities could cause health problems, regularly review the work activities and where possible implement engineering controls or substitute existing substances for less hazardous ones and so reduce the occupational risk to employees and other third parties affected by the Trust's scope of works.

Should any person have a health problem which could affect their health, safety and welfare while at the workplace, they shall inform their immediate Supervisor.

2.22 Manual Handling

Responsibilities

The CEO responsible for health and safety will ensure that adequate resources are provided in order that manual handling can be avoided wherever practicable and will also provide training to any operative who is required to carry out manual handling operations as part of their work.

Supervisors are responsible for ensuring that all manual handling operations have been correctly assessed in accordance with Risk Assessment procedures, they will ensure that manual handling is avoided wherever practicable and that operatives who are required to carry out manual operation have been correctly trained.

Operatives must avoid manual handling wherever practicable by using mechanical handling devices provided by the Trust. Once trained, operatives must use correct handling techniques to avoid injury.

Where an operative is injured as a result of a manual handling operation it must be reported in accordance with First Aid and Accident/Incident Reporting procedures.

Manual Handling Risk Assessment

Manual Handling Risk Assessments will be carried out as part of the General Risk Assessment Procedure.

For the purpose of risk assessment and identifying precautions, manual handling will be defined as:

The movement of any item using bodily force including:

- Lifting
- Lowering
- Pulling
- Pushing
- Twisting

- Turning
- Supporting

Handling and Stacking

When handling, operatives must use mechanical devices wherever practicable. Supervisors must ensure that mechanical handling devices are available and that materials are correctly stacked so that mechanical devices can be used safely.

Where manual handling of material is unavoidable then it must be ensured that it is carried out by trained operatives using the best possible method to avoid injury.

Manual handling methods to avoid injury should include:

- Manual handling operations should be planned
- The weight of the load should be known
- Heavy items should be positioned so that they can be slid rather than lifted
- Operatives must not be allowed to manually handle any materials which are too heavy
- Work stations must be so designed to avoid the necessity to bend down or twist the torso repeatedly or over reach when carrying out any operation
- All materials must be free from burrs or sharp edges where possible
- Wherever possible materials must be stacked so as to avoid handling them twice and also avoid creating any additional hazards
- Use PPE to avoid hand injuries

Personal Protective Equipment

Personal protective equipment will be issued as a result of the findings of the relevant risk assessment, having regard for the hazardous nature of the material being handled

Manual Handling Training

Manual handling training will be provided to all operatives who are required to carry out manual handling operations. All training provided will be in accordance with the Trust Safety Training and Information procedure.

2.23 Construction (Design and Management) Regulations 2015

The Construction (Design and Management) Regulations 2015 places duties on clients to ensure we cooperate with all parties involved in construction projects and that we manage our work to ensure a safe site for all parties involved.

Whilst undertaking the role of the client we will ensure the following:

- make suitable arrangements for managing their project, enabling those carrying it out to manage health and safety risks in a proportionate way.

These arrangements include:

- appointing the contractors and designers to the project (including the principal designer and principal contractor on projects involving more than one contractor) while making sure they have the skills, knowledge, experience and organisational capability
- allowing sufficient time and resources for each stage of the project
- making sure that any principal designer and principal contractor appointed carry out their duties in managing the project
- making sure suitable welfare facilities are provided for the duration of the construction work
- maintain and review the management arrangements for the duration of the project
- provide pre-construction information to every designer and contractor either bidding for the work or already appointed to the project
- ensure that the principal contractor or contractor (for single contractor projects) prepares a construction phase plan before that phase begins
- ensure that the principal designer prepares a health and safety file for the project and that it is revised as necessary and made available to anyone who needs it for subsequent work at the site

For notifiable projects (where planned construction work will last longer than 30 working days and involves more than 20 workers at any one time; or where the work exceeds 500 individual worker days), commercial clients must:

- notify HSE in writing with details of the project
- ensure a copy of the notification is display

2.24 Driving Trust vehicles

When using a vehicle supplied by the Trust all employees must conform to all requirements of the Road Traffic Acts, associated legislation and the Highway Code.

Where employees are driving in the course of their employment or driving vehicles supplied by the Trust they must:

- Ensure that the vehicle is serviced, maintained and operated in accordance with the manufacturer's guidelines
- Be in possession of a UK driving licence. This must be checked by your manager every year and endorsements notified to the insurers (for Trust vehicles and when driving your own vehicle on Trust business)
- Ask their GP if any prescribed medicine will affect their driving ability; if so, employees must refrain from driving and inform their immediate supervisor
- Employees are not permitted to operate a hand-held mobile phone whilst driving Trust vehicles, the punishment for such an offence is a £100 fine and three penalty points on your driving license. Therefore, do not operate your hand-held mobile phone whilst driving; it is dangerous

- Wear glasses or lenses if prescribed for this activity
- Never drive Trust vehicles under the influence of alcohol or illegal drugs or prescription medication which may affect your ability to drive safely

Employees driving vehicles should avoid the use of over-the-counter medications such as anti-depressants, antihistamines for hay fever, nettle rash, asthmas, eczema or travel sickness preparations or cough and cold remedies, which can adversely affect driving.

Before setting off:

- Check tyre pressures and visual condition, tread depth (cuts or obvious damage, especially to the tyre walls) and general vehicle condition
- Check that all seat belts are working and in good order, and worn by all vehicle occupants where provided
- Adjust driving techniques to suit weather and traffic conditions
- Ensure you have read through the driving Trust vehicles section in employees' handbook

On arrival to destination or site:

- Beware of un-metalled roads and soft ground on sites; where possible park off site (not in an area causing an obstruction to highway, site traffic or the emergency services)
- Observe all traffic management arrangements in place for the site
- Make sure the vehicle is secured and any valuable items stored out of site such as satellite navigation systems and mobile phones

When driving on business on behalf of the Trust and the vehicle is not supplied by the Trust you must have full comprehensive insurance cover to cover the driver and any passengers in the course of such business use. A copy of the insurance certificate will be required before driving on Trust business.

2.25. ENVIRONMENTAL POLICY STATEMENT

1. St. Cuthbert's Roman Catholic Academy Trust recognises its environmental duties under the Environmental Protection act 1990 and the Waste (England and Wales) (Amendment) Regulations 2012, the CEO Responsible for Health, Safety and Environmental Issues, Ged Fitzpatrick, recognises that he has a responsibility to take an environmentally (and socially) responsible approach both to existing activities and to possible new developments.
2. The Trust, so far as is reasonably practicable, proposes to pay particular attention to:
 - a) Minimise disturbance to the local and global environment, and to the local communities and wildlife.
 - b) Follow the waste management hierarchy as outlined in the Waste (England and Wales) (Amendment) Regulations 2012. We will follow the hierarchy outlined below for waste generated.
 - (1) Prevention
 - (2) Preparing for re-use
 - (3) Recycling
 - (4) Recovery
 - (5) Disposal.
 - c) Minimise use of energy and raw materials and to adhere to the principles of sustainability.
 - d) Consider the environment in the design of processes and products and the maintenance of equipment.
 - e) Provide information on the use and final disposal of products.
 - f) Ensure that all employees and suppliers are adequately informed about the Trust environmental policy.
 - g) Minimise the use of product related materials and services such as packaging or transport.
3. In order that the Trust can achieve these objectives, it is important that employees recognise their duty, whilst at work, to take reasonable care of the environment. Employees should also co-operate fully with the Trust or anyone else concerned, to ensure that their legal and moral obligations are performed or complied with.

Signed:

CEO Responsible for Health, Safety & Environment
Ged Fitzpatrick
September 2018
